

Mars Cycle Charts

The Mars Cycle

Mars is the most energetic of all the planets. It indicates the creative energy in operation. Harmoniously directed, it relates to **all constructive activity** in which **force, quick action,** or even **violence** is involved. **Manufacturing** and **industrial progress** are typical of Mars. **Soldiers,** members of the **navy, policemen, sheriffs, law-enforcement officers, surgeons, operations, firemen and fires, hunters, industrial workers, athletes.**

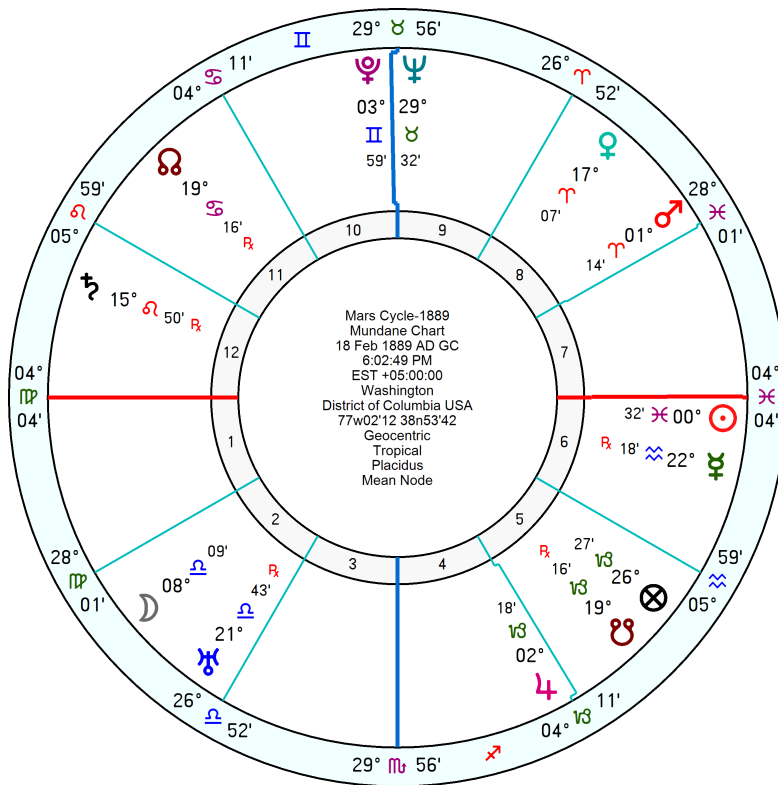

Mars energy moves so fast it tends to accidents. **Traffic accidents,** especially if Mars is connected with the 3rd house.

If Mars energy meets with resistance it can be destructive: **explosions, banditry, burglary, violent defiance of the law. Intoxicants, drunkenness, gambling, houses of ill repute, assault, military activities.** Even when harmonious his energy tends to so much force and speed that strife of some kind is always present in the events he brings on.

In thought he rules **mechanics,** in business, **manufacturing** and military **professions,** in politics, **industrial workers, law enforcement agencies: army, police, navy.**

of foreign countries (7th): in
consequence of revolution in Mexico,
the president orders 20,000 troops to
San Antonio and along the Mexican
frontier, for division manoeuvres and
to check filibustering and border
fighting on the American side

Mars Cycle Charts

Mars Cycle – 1934

Zain used a time of 8:35am with the MC at 0 ♄ 01, the Asc at 19 ♄ 34.

Mars, in the 11th, is also the ruler of the 12th (relief and crime) and of the 7th (foreign countries and war).

It is sextile the MC, therefore the strife and conflict it indicates tend to stimulate business; but as it is also semi-square ♀ in the 10th, in certain respects it creates a friction in relation to business procedure that hampers prosperity.

It is also semi-square the Asc, so that the strife and aggression affect the personal welfare of many people.

Its most important aspects, however, are the conjunction to the ☉ in the 11th, influencing those in political life, and the conjunction with the ☽ in the 12th, bringing the populace in

affliction through measures that must be taken for the relief of the needy.

Thus while the other positions in the chart, such as ♄ in the house of labour in opposition ♄ in the house of relief, cannot be overlooked in reading the figure, the thoughts of conflict and war, such as ♂ rules, are shown to have direct access to the MC, ♀, Asc, ☉, and ☽, with greater facilities for influencing the persons ruled by these planets and positions—women, for instance, under ♀; politicians under the ☉, and the common mass of people under the ☽—and for stirring up unusual activities in the departments ruled by the houses in which these planets are found. That is, they have ready access to the 10th (business and administration), 11th (Congress and Governors) and to the 12th (charity, relief, crime, and prisons). And because the energy flows so readily to these persons and departments, they will respond in a more pronounced manner than other types of persons and other departments of national life. They, therefore, should receive special consideration in reading the Cycle Chart.

1934-03-20 ♂ ∟ Asc (people): fire at Hakodate, Japan killed over 1,500, hurt 2,000, and destroyed 23,000 homes. At N.Y. City, 7 were killed by fire in a tenement on 2nd Ave

1934-03-23 ♂ ∟ ♄: March 24, at Lynchburgh, VA., fire killed 14 at the Federal Transient Relief (transit ♂ in the house of relief, 12th) Bureau, and injured 75 others

1934-03-26 ♂ ∟ ☽ in the house of relief (12th): at Washington, the Senate and the House passed the “billion dollar” Independent Office Bill granting \$228,000,000 in larger allowances to War veterans and government employees
